EVOLUTION OF MONEY

A Blockchain is a chain of blocks that contain information. The data which is stored inside a block depends on the type of Blockchain. For Example, **A Bitcoin Block contains information about the Sender, Receiver, number of bitcoins to be transferred.** The first block in the chain is called the Genesis block.

What is Bep20?

Binance Smart Chain (BSC) is a block chain network built for running smart contract-based applications. BSC runs in parallel with Binance's native Binance Chain (BC), which allows users to get the best of both worlds: the high transaction capacity of BC and the smart contract functionality of BSC. Binance Smart Chain has made immense traction in early

So far partly thanks to Ethereum congestion and gas fee issues, which has caused developers and staking investors to look for other options. The BSC community made the network even more appealing to new users as a cost-effective and stable alternative, by lowering its gas fee from 15 Gwei to 10 Gwei to counter Binance Coin (BNB)'s insane price jump to over \$300 in February.
